Allowable Subject Matter

1. Claims 1-3 and 5 are allowed.
2. The following is an examiner's statement of reasons for allowance:
3. The prior arts of record do not anticipate or render obvious to one of ordinary skill in the art a backlight unit comprising various elements as claimed, more specifically a plurality of lamp tubes arranged in parallel within a housing and wherein each of the lamp tubes has one low-voltage end connected to a first plastic capping piece and one high-voltage end connected to a second plastic capping piece wherein a first connector is installed at a rear side of the first plastic capping piece and has a terminal therein to electrically connect to the low-voltage end of the lamp tube wherein the first connector is electrically connected to a second connector through a first wiring line and the second connector is electrically connected to the high-voltage end of the lamp tube through a second wiring line and a plurality of reflection plates disposed underneath each of the plurality of lamp tubes and each of the reflection plates being integrated with corresponding lamp tubes to constitute an independent lamp module cartridge, which is removable from one side of the housing.
4. The closest reference JP 11-002813 discloses a backlight unit that includes a plurality of lamp tubes and a plurality of reflection plates disposed underneath each of the plurality of lamp tubes and each of the reflection plates being integrated with corresponding lamp tubes to constitute an independent lamp module cartridge, which is removable from one side of the housing. Further, USPAT 6,147,724 discloses a backlight unit that includes one fluorescent lamp tube having a low-voltage end and a

high-voltage end. Further, the newly cited reference US 2004/0119418 discloses a backlight unit including a plurality of lamps having a low-voltage end and a high-voltage end, a plurality of inverters, a plurality of first and second power lines. However, all of the references alone or in combination fail to teach or suggest the claimed backlight unit wherein a first connector is installed at a rear side of the first plastic capping piece and has a terminal therein to electrically connect to the low-voltage end of the lamp tube wherein the first connector is electrically connected to a second connector through a first wiring line and the second connector is electrically connected to the high-voltage end of the lamp tube through a second wiring line, including all other recitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
